“

Information, Cybersecurity, Privacy and Organizational Resilience are essential components of Governance and Management.

“

Every well-run institution needs to ensure it pays uttermost care in ensuring its information assets are kept safe and secure.

Cybersecurity

If information/cyber security fails in an organization, the Board and the Executives are liable to the Law (Litigation) and to the Regulators (Fines and Penalties).

Professional Summary

Dr. Orlando Olumide Odejide leads the audit, advisory, assurance of Cybersecurity strategies and solutions to enable the achievement of the organization's business objectives. He has been responsible for the effective design, development, implementation and operation of cybersecurity and information technology products, services and support for over 500 organizations at present.

He has 25 years' experience in the field of information technology, cybersecurity, risk management and consulting.

Specialization:

- Strategy, Planning and Direction Setting
- Human Resource Development, People Management and Performance Management.
- Risk Management and Monitoring using COSO and Management of Risk (MoR) and ISO 31000
